RE: Our experience with Plains Builders

March 5, 2018

To Whom It May Concern:

We would recommend Plains Builders for any office construction project based upon our experience with them over the last 13 years. Plains built a wonderful award-winning facility for our eye clinic in 2005. We could not be happier with the relationship we have had with them over the years.

Our patients frequently comment about the look and feel of our office. As the practice has grown, Plains has been there to help us expand and change as circumstance dictated. We have undergone 3 major renovations to the facility since we moved into the building in July of 2006.

Our architect is very creative and Plains has risen to the occasion to deliver on his vision for our facility. I know it was not easy as our office has a very unique appearance. Plains executed his design perfectly well each time we called upon them.

The initial construction afforded us the opportunity to expand into a second floor space as we needed. In 2013 we finished out the upstairs portion of the building. Some of the design elements were unusual and Plains was able to create a facility that we enjoy working in daily and is aesthetically pleasing. Plains came in on time and the result is beautiful.

In the summer of 2017 we had the need to update the appearance of our downstairs office and retail space. We had no hesitation in calling on Plains to help us with the project. They were able to work around our clinic schedule with only minor disruptions. Again, many of the design elements were challenging and they handled them with great expertise. Our patients are very complimentary of the result and we are very pleased.

Plains has proven themselves to be easy to work with, mindful of our deadlines, and conscientious with construction costs. Our building has aged well and they have been responsive when we've had any issues that needed attention. I believe our building is a great testament to the quality of construction you will get should you elect to choose Plains for your project. We would highly recommend Plains Builders for your office or retail project.

Sincerely,

John Todd Cornett, OD
