Tim Koetting
Plains Builders
Amarillo, TX

To whom it may concern:

We recently underwent a very extensive remodel and construction project here at Brown Buick GMC at 4300 S Georgia St in Amarillo. We contracted with Plains Builders to come in and be the designer, planner and general contractor on our project. It was a 9 month, multi stage job with extensive demolition and rebuild involved. We had to remain open at the job site as well during the remodel to continue our business. We could not relocate to a temporary site.

I am pleased to say that Tim and all his staff came in and got the job done with as little disruption as possible. The work was all completed in a timely manner as contracted and agreed upon. The finished product is a quality representation of Plains Builders work. I can easily recommend them for any project a business or individual may have. It was a very favorable experience from start to finish. I would not hesitate to use Plains again for any future projects Brown Auto Group may have.

Sincerely,
